CITROEN

Citroen keys from approx "M" registration onwards have a built in immobilizer which is situated in the head of the key in the form of a transponder chip, this has to be synchronized with the ECU (engine control unit) Citroens also require a 4 digit security code unique to the vehicle to allow further keys to be programmed to the ECU (Engine control unit) this is given out with the vehicle at new on a Blue credit sized card along with the key number and radio code and is usually found in the service and handbook folder or can be obtained from the dealer.

We can program these keys at the roadside and also obtain the key code and security code on your behalf if needed

Please call for a quote or any if any information is required
