VAUXHALL

Vauxhalls from about "M" registration onwards have an immobilizer built into the head of the key in the form of a Transponder chip which has to be programmed onto the vehicle using specialist equipment at the vehicle, Vauxhalls also require a 4 digit security code unique to the vehicle to allow further keys to be programmed to the ECU (Engine control unit)

We can program a new key to your vehicle with or without this information due to the advanced equipment that we carry on board and also erase any old keys that may have been lost stolen or retained by previous owners

Please call for a quote or any if any information is required

VAUXHALL
